

Includes AG

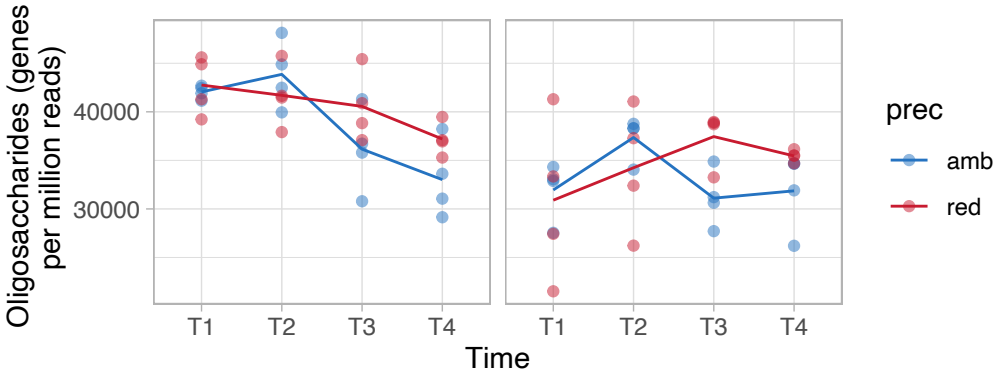

Doesn't seem to include any of the enzymes we assayed

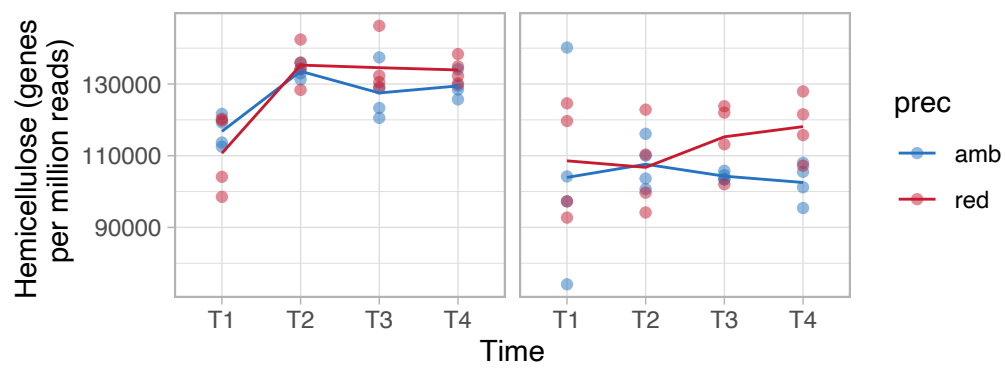

Doesn't include any enzymes we assay

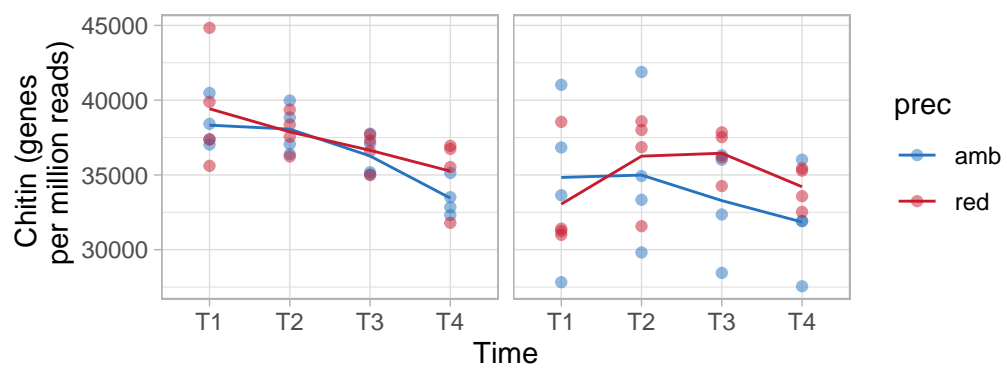

Doesn't include any enzymes we assayed

Includes BX which Ashish (not Nuccio) assigned to families GH52, GH54, GH120 while Nuccio assigned to GH39. BX does belong to these 4 families, but Ashish only classified it to 3, and these 3 he assigned to hemicellulose while GH39 he assigns to cellulose

Includes NAG as assigned by Ashish (not Nuccio)

Includes the enzymes BG, CBH, and the gene family for BX according to Nuccio (GH39) even though BX degrades hemicellulose, not cellulose
